- E. SESSION SUMMARY:

Site had a big circular object that seemed to be moving around in a sweeping motion. I felt that I was outside and the area was isolated with brown dry grass. The land was flat but you could walk upward towards a rather high hill. A vehicle was nearby.

The object had an individual with it and it seemed that he was holding on to it or one had to hold on to it. Although the site and activity seemed somewhat rugged, there was enjoyment.
